FONTS USED IN THE GAME:

The title represents destruction and lingering echoes of the past. "Sundering" reflects a broken world and a revenge-driven story, while "Bells" symbolize memory, death, and spiritual rituals inspired by Asian culture.

SUNDERING BELLS

The title uses an ink brush stroke style, inspired by traditional Japanese and Asian calligraphy. The rough, uneven strokes give the text an organic and hand-crafted feel, reflecting imperfection, emotion, and raw intent. This style visually reinforces the themes of discipline, rage, and spiritual weight found in a souls-like experience. The title has a dark, solemn, and mythic tone. It feels ceremonial rather than aggressive, aligning with the game's slow, punishing combat and meditative atmosphere. The visual weight of the lettering suggests history, suffering, and inevitability—key elements of a revenge-based narrative.

Primary Font: The Stranger

The Stranger is a stylized display font that mimics expressive brush strokes with sharp edges and textured gaps. Its bold yet imperfect form makes it suitable for conveying tension and mystery. The font enhances the game's identity by blending traditional aesthetics with a modern, gritty tone, supporting the fusion of Asian cultural influence and dark fantasy.

Secondary Font: Anime Ace 2.0 BB

Anime Ace 2.0 BB is used for supporting text, including UI elements, dialogue, and cutscene subtitles. Its clean, hand-drawn appearance ensures high readability while maintaining a stylized tone that complements the game's artistic direction.

The font bridges traditional anime-inspired storytelling with modern UI clarity, making it suitable for narrative-heavy moments without distracting from the visuals. Its consistent stroke weight and rounded forms help convey emotion clearly during cutscenes while remaining accessible during gameplay.
